

Cybersecurity Task Documentation

Task 1: Burp Suite Web Traffic Analysis

Objective:

Capture and analyze HTTP login request traffic using Burp Suite and a test site (DVWA).

Tools Used:

- Burp Suite (Community Edition)
- DVWA (Damn Vulnerable Web Application)
- Kali Linux

Steps Followed:

1. Set up Burp Suite:

- Opened Burp Suite and selected Proxy > Intercept > Intercept is on.
- Configured browser to use Burps proxy (127.0.0.1:8080).
- Installed Burps certificate for HTTPS interception.

2. DVWA Setup:

- Hosted DVWA on localhost using XAMPP or Apache server.
- URL accessed: `http://localhost/DVWA/`

3. Intercept Login Request:

- Submitted login form with:

Username: admin

Password: password

Cybersecurity Task Documentation

- Burp Suite captured the request:

Method: POST

Endpoint: /DVWA/login.php

Parameters sent: username=admin&password=password&Login=Login&user_token=<token>

4. Request Analysis:

- Verified headers: User-Agent, Host, Origin, Cookie, etc.
- Confirmed session token (PHPSESSID) and CSRF token (user_token).
- Understood session handling and login mechanisms.

5. Forwarded the Request:

- Let the request go through using the Forward button.
- Checked login result in browser (success/failure).

Next Task: Juice Shop CTF Challenge

OWASP Juice Shop

Goal: Practice real-world web vulnerabilities via Capture the Flag challenges.

Setup Overview:

1. Opened Juice Shop in Browser:

- URL: http://localhost:3000 or hosted version
- Ensured the app is up and accessible

Cybersecurity Task Documentation

2. Started Observing Site Behavior:

- Looked through product pages, login, registration, and admin panel
- Enabled Burp Suite for traffic observation and intercepting
